shibib@usf.edu | 386-285-0397 | 4202 E. Fowler Avenue, Tampa, FL 33620

Summary	Electrical and Electronics Engineering student at the University of South Florida with experience in robotics, UAV systems, and embedded systems. I have experience with Python and C and am interested to learn more about modeling and simulation using Simulink. I am seeking an internship to gain industry experience and deepen knowledge in advanced engineering applications.
Education	University of South Florida Tampa, FL BSc Electrical and Electronics Engineering (Aug 2029) GPA (3.93)
Skills & Programming	C, Python, Embedded Systems, Project Management
Certifications	CLASP (Crisis, Loss, and Suicide Prevention)
Experience	TROPICS Lab University of South Florida Tampa, FL Undergraduate Researcher (Jul 2026 – Present) • Helped optimize iDCS hardware and performed experiments on liquid and solid phantoms at 1064 nm • Investigated absorption coefficient (μ_a) and reduced scattering coefficient (μ_s') of biological tissue phantoms • Helped program and integrate an FPGA into the DCS system Society For Critical Operations and Preparedness Engineering University of South Florida Tampa, FL Treasurer & Project Lead (Jan 2026 – Present) • Led telemetry setup between flight controller, base station and controller • Designed and led assembly and soldering of UAV hardware • Designed and led integration of an electromagnet into the UAV structure for operational use • Led UAV setup and calibration processes within ArduPilot for mission readiness • Organized and led a hands-on STEM outreach event for ~90 4th graders at Temple Terrace Elementary, teaching fire, hurricane, and emergency-response fundamentals Member (Aug 2025 – Jan 2026) • Helped design the system layout, ensuring mechanical, electrical, and software components integrated smoothly • Contributed to improving overall drone design • Assisted in setting up telemetry between flight controller, base station and controller

Housing & Residential Education | University of South Florida | Tampa, FL
Resident Assistant (Jul 2026 – Current)

- Served as a support system for residents, guiding them through personal and academic challenges and connecting them to campus resources
- Mediated conflicts and enforced housing policies while maintaining positive relationships with residents
- Modeled leadership and integrity as a peer role model within the community
- Delivered presentations and managed room-check/closing spreadsheets and maintenance work orders
- Planned community-building events to boost floor engagement
- CLASP certified through RA training

IEEE | University of South Florida | Tampa, FL
Member (Aug 2025 – Spring 2026)

- Assembled 7s3p Li-Ion Battery for the Smart Systems
- Assisted with the center console GUI
- Designed small scale solar charger for mobile devices
- Contributed to translating the small-scale charger into larger model for EV

Projects

Mastermind Robotics Club | Mastermind School | Dhaka, Bangladesh
President (Sept 2024 – 2025 May)

- Designed and built a maze-solving robot using microcontroller and sensor-based navigation.
- Organized Line following robot workshop for middle school students
- Designed and built an automatic fire detecting and extinguishing robot.

Foundations of Engineering Lab | University of South Florida | Tampa, FL
Project Lead (Aug 2025 – Dec 2025)

- Led a team of five to develop a microcontroller-based line following robot with obstacle detection using ultrasonic sensors
- Maintained team coordination, set up meetings and kept notes of meeting minutes to keep all members informed.
